

FCC

We have two video devices, a VP-100 and a D-Link VRS. They both call using all providers in our house. The VP-100 has a wait time of up to 20 minutes to catch service you. I switched to the D-Link "I 2 eye" to get better access. It quickly opens on screen just as fast as Hipvrs, Hovrs, Ip-relay and Sprintvrs. Only takes a few minutes.

We have to pay 2 bills you. It is not fair and that is enough!
